

## Pure Tech India

News Letter April 2009 Week 1

Pure Tech India exported its first consignment to M/s Punj Lloyd, Indonesia three equipments of Anti Fouling Units for their client M/s PT Shell, Indonesia.

**Application:** The intended application of the units is to prevent microbial growth in Fire water tank. The unit will dose anti fouling chemical to the water tank which can be used for fire fighting.

**Features:** The innovative features of the equipment include Flowchart display to educate the visitor of the liquid flow direction and intended usage. The system has both Manual and Automatic operation. The unit has flow meter for anti fouling liquid dosage rate and pH meter chart which can be handy in knowing the percentage of antifouling chemical dosed.

Pure Tech India already enjoys clientele in Singapore, Malaysia and Australia in the Asian region and has completed exports to Nigeria and Dubai as well.

We will update again next week

**..... be the best**
